Concept: Degree Completion - Reverse-Transfer for Degrees

- Many Colorado Community College System (CCCS) students transfer to a public 4-year institution prior to earning a credential.
- Direct all public, 4-year institutions to notify CCCS when a transfer student has accumulated 60 credit hours.
- Direct CCCS to run a degree audit on these students. If the student has completed the requirements for an AA/AS degree, CCCS shall notify the student that a degree will be issued by CCCS unless the student notifies CCCS that they do not want a degree conferred (opt-out).
- If the degree audit conducted upon the accumulation of 60 credit hours results in a deficit, CCCS will notify the student of the deficit.
- The catalogue or other marketing materials for CCCS and 4-year institutions will provide information to students relating to the reverse-transfer program.
